

John Crowe Ransom and Allen Tate: At Odds about the Ends of History and the Mystery of Nature

The Fugitive-Agrarians were an influential literary group that began at Vanderbilt University in the 1920s. Although the philosophically driven alliance was short-lived, two of its members, John Crowe Ransom and Allen Tate, went on to become influential Southern poets and theorists. In this work, a self-proclaimed third-generation Fugitive-Agrarian concentrates on the history and mystery of nature. The author supports the recovery of fundamental principles required for the economic, social and political health of our communities. He explores Fugitive-Agrarian concepts of nature, history, science, industry, person, family and community. His discussion focuses particular attention on John Crowe Ransom and Allen Tate and how they diverged in their philosophies of intellect and the written word.
